

AVALON

Hollywood super club Avalon brings its highly charged brand of entertainment to Singapore's Marina Bay Sands, with an ambitious set-up that includes state-of-the-art lasers and 3D mapping. The angular Crystal Pavilion that houses the club is designed by world-renowned Canadian/Israeli architect Moshe Safdie, and spans 17,000 square feet across two levels. It forms a crystalline 'island' that appears to float on the waters of Marina Bay, while the interior, designed by New York firm Roman & Williams, makes use of natural crystals to illustrate the venue's defining themes of light, energy and sound. *South Crystal Pavilion, Marina Bay Sands, 2 Bayfront Avenue, Singapore. +65 6597 8333. avalon.sg*

As reclamation expands the shoreline of Southeast Asia's most exciting metropolis ever further, a growing number of design-conscious venues are setting up shop in the city.
